*". . .the heat is distributed throughout the entire house with incredible evenness. Another feature of the ETS units we have found to be better than we expected is the ability to heat up the house fast. When we leave for a day or two we turn the heat down knowing that within 15-20 minutes after we get back home we can have the house toasty again. It's great!"*

❖ Durango, Colorado

*"I am writing in regards to our Steffes Storage Heaters. During the recent cold snap we were delighted with our heaters. At no time did we experience any discomfort due to the monitoring of our system. The heaters were able to maintain the temperature in our home with no problem. Prior to the storage units being installed, we could always tell when we were being monitored but, since the units were put in, the temperature stays very constant. Sorry we didn't have the units years ago."*
